Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

5. The present application is directed to an apparatus for ascertaining and correcting an optimum sampling time for an over-sampled digital bit stream in which samples are taken at n different sampling times for each bit. Each independent claim identifies the uniquely distinct features "samples are taken at n different sampling times for each bit" and "a reading unit for reading each next bit from said over-sampled digital bit stream at said optimum sampling time" and "correlation determining unit providing

<u>time</u>" and "<u>said bit read at said optimum sampling time being fed into said comparative</u> sequence". The closest prior art, Beladi et al. (US 5,699,389) discloses an oversampling correlator with varying clock phase, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
